

Basic Compound

Basic Compound example

- 2 single choice question
- 2+4 expressions
- 3 conclusions

This example shows how to use compound logic in expressions to combine answers to different questions. We ask 2 questions, and then combine answers with compound logic.

A] expression

Refers back to answer to q1 and q2

B] expression

Refers back to answer to q1 and q2

C] expression

Refers back to answer to q1 and q2

D] expression

Refers back to answer to q1 and q2
